RE: CP 1133 – Renovations to Surrogate’s Court

Attached for your review is a draft resolution appropriating the sum of $200,000 into planning funds. This appropriation will fund the planning renovation of the Surrogate’s Court and the accessible restrooms, replacement of worn surfaces, mechanical and electrical upgrades for energy efficiency inside the facility.

Pursuant to the SEQRA negative declaration for a Type I action issued for the Riverhead County Center site by the Central Pine Barrens Joint Planning and Policy Commission as lead agency, it has been determined this project will not have a significant environmental impact.

An e-mail copy of this resolution has been sent to CE RESO Review saved under the title Reso-DPW-CP1133 Resolution Surrogate’s Court.doc.

RE: INTRODUCTORY RESOLUTION APPROPRIATING FUNDS IN CONNECTION WITH THE REMOVAL OF TOXIC AND HAZARDOUS MATERIALS IN COUNTY PARKS (CP 7185)

Enclosed please find a draft resolution and supporting documentation relative to the above-captioned. An e-mail version of this resolution was sent to CE RESO REVIEW under the file name “RESO-PKS- Appropriating Funds for CP 7185 - Removal Toxic Materials.doc”.

Frequently in the course of rehabilitating or restoring parks or historic structures, hazardous materials are discovered including lead, asbestos, and PCBs, among other substances. Special training and procedures must be followed in handling these materials, which increases the costs associated with their removal.

The funds appropriated under this resolution will go toward removing toxic and hazardous materials discovered during the course of renovation, restoration or demolition of structures, installing and upgrading leak detection systems to comply with State and Federal regulations, removing underground storage tanks, and other projects as needed.

Should you require anything further, please contact my office at 4-4984.

In Federal Fiscal Year 2010 Suffolk County was allocated $600,000 in capital assistance funds for Bus and Bus Facilities under FTA Section 5309. Suffolk County Transit replaces the vans used in its fleet for its paratransit service (SCAT) on a regular basis. This project proposes to utilize federal funds to offset the cost of purchasing vans eligible for replacement under federal guidelines. In order for the County to apply for these Federal funds (80% share), and State (10% share) funds, a resolution authorizing the County to apply for the funds is needed. The County will provide a local 10% share.

20. Conflicts of Interest

The Contractor shall not, during the Term, pursue a course of conduct which would cause a reasonable person to believe that he or she is likely to be engaged in acts that create a substantial conflict between its obligations under the Agreement and its private interests. The Contractor is charged with the duty to disclose to the County the existence of any such adverse interests, whether existing or potential. This duty shall continue as long as the Term. The determination as to whether or when a conflict may potentially exist shall ultimately be made by the County Attorney after full disclosure is obtained.

23. Assignment and Transfer

a. The Contractor shall not delegate its duties under the Agreement, or assign, transfer, convey, or otherwise dispose of the Agreement, or any of its right, title or interest therein, or its power to execute the Agreement, or assign all or any portion of the monies that may be due or become due hereunder, (collectively referred to in this paragraph 23 as “Assignment”), to any other person, entity or thing without the prior written consent of the County, and any attempt to do any of the foregoing without such consent shall be a material default by the Contractor.

24. No Intended Third Party Beneficiaries

The Agreement is entered into solely for the benefit of the County and the Contractor. No third party shall be deemed a beneficiary of the Agreement and no third party shall have the right to make any claim or assert any right under the Agreement.

25. Certification as to Relationships

The Contractor certifies under penalties of perjury that, other than through the funds provided in the Agreement and other valid agreements with the County, there is no known spouse, life partner, business, commercial, economic, or financial relationship with the County or its elected officials. The Contractor also certifies that there is no relationship within the third degree of consanguinity, between the Contractor, any of its partners, members, directors, or shareholders owning five (5%) percent or more of the Contractor, and the County.

economic problems to the communities in which they occur. To achieve this goal, the Division
employs an integrated control program. Control measures are employed in a hierarchical
manner that emphasizes prevention. Control first proceeds from surveillance and more
permanent "environmentally friendly" measures such as water management and biological
control, then through the highly specific larvicides and finally, uses chemicals such as
adulticides only after other measures prove to be either insufficient or not feasible. This
integrated approach is recognized as the most effective and environmentally sound manner in
which to conduct a mosquito control program. Only pesticides that are federally and NYS
registered and approved for mosquito control will be used. All machine work within existing
mosquito ditches for the purpose of eliminating mosquito breeding areas that involves BMPs 4
and above will be reviewed by the Suffolk County Office of Ecology with the Department of
Health Services, the Council on Environmental Quality and the Department of Environment and
Energy and approved by the N.Y.S.D.E.C. in order to minimize environmental impacts on
wetlands; and

WHEREAS, Suffolk County Resolution No. 285-2007 adopted the Suffolk County Vector
Control and Wetlands Management Long Term Plan and State Environmental Quality Review
Act Findings Statement for the Final Generic Environmental Impact Statement; now, therefore,
be it;

RESOLVED, that based on the information received, a quorum of the Council recommends to
the Suffolk County Legislature and County Executive, pursuant to Chapter 279 of the Suffolk
County Code, that the proposed 2012 Vector Control Annual Plan of Work will be carried out in
conformance with the conditions and thresholds established for such actions as set forth in the
Suffolk County Vector Control & Wetlands Management Long Term Plan Final Generic
Environmental Impact Statement (FGEIS) and associated Finding Statement as adopted by
Suffolk County. Therefore, no further SEQR compliance is required pursuant to Title 6 NYCRR
Part 617.10(d)(1) and the Legislature and County Executive should adopt a resolution stating as
such.
MEMORANDUM

    Honorable William J. Lindsay, Presiding Officer

FROM: R. Lawrence Swanson, Chairperson

DATE: October 19, 2011

RE: CEQ Review of the Vector Control 2012 Annual Plan of Work

At its October 19, 2011 meeting, the CEQ reviewed the above referenced proposal. Pursuant to Chapter 279 of the Suffolk County Code, and based on the information received, as well as that given in a presentation by Dominick Ninivaggi, Superintendent, Department of Public Works Office of Vector Control, the Council advises the Suffolk County Legislature and County Executive, in CEQ Resolution No. 56-2011, a copy of which is attached, that the proposed 2012 Vector Control Plan of Work will be carried out in conformance with the conditions and thresholds established for such actions as set forth in the Suffolk County Vector Control & Wetlands Management Long Term Plan Final Generic Environmental Impact Statement (FGEIS) and associated Finding Statement as approved by Suffolk County in 2007. Therefore, no further SEQR compliance is required pursuant to 6 NYCRR, Part 617.10(d)(1).

If the Legislature concurs with the Council on Environmental Quality's recommendation that the action is in conformance with the FGEIS and Finding Statement, the Presiding Officer should cause to be brought before the Legislature for a vote a determination that SEQR is complete and no further compliance is necessary.

Enclosed for your information is a copy of CEQ Resolution No. 56-2011 setting forth the Council's recommendations and associated information received. If the council can be of further help in this matter, please let us know.

2012 ANNUAL PLAN OF WORK - DIVISION OF VECTOR CONTROL

SUFFOLK COUNTY DEPARTMENT OF PUBLIC WORKS
DIVISION OF VECTOR CONTROL

2012 ANNUAL PLAN OF WORK

The Suffolk County Department of Public Works, Division of Vector Control, is responsible under the County Charter for controlling mosquito infestations that are of public health importance. The Division's responsibility is to control mosquito infestations that significantly threaten public health, or create social or economic problems for the communities in which they occur. The Division meets its responsibilities in consultation with the Suffolk County Department of Health Services (SCDHS) and the appropriate federal, state and local agencies. This Plan of Work has been prepared pursuant to and in compliance with the Vector Control and Wetlands Management Long Term Plan and Generic Environmental Impact Statement (the Long Term Plan). The Long Term Plan was approved by the County Legislature as Resolution 285-2007 on March 20, 2007 and signed by the County Executive on March 22, 2007. The 2012 Annual Plan of Work is therefore governed by State Environmental Quality Review Act (SEQRA) Regulation 617.10(d)(1) which provides the following: "When a final generic EIS has been filed under this part (1) no further SEQR compliance is required if a subsequent proposed action will be carried out in conformance with the conditions and thresholds established for such actions in the generic EIS or its findings statement." This issue is also discussed in the Findings, appended hereto, pages 7 and 58. This Annual Plan complies with the reporting requirements in Executive Order 15-2007 (Suffolk County Vector Control Pesticide Management Committee) and Resolution 285-2007 (which adopts the Findings Statement for the Long-Term Plan). The reporting requirements of Resolution 285-2007 are satisfied within this Annual Plan, and the Pesticide Management Committee will submit a report to CEQ independently to satisfy Executive Order 15-2007.

2012 SUMMARY

1. Water Management: Water Management activities will conform to the guidelines outlined in the Long Term Plan and Finding statement’s Wetlands Best Management Practices (BMP’s). Because the Wetlands Stewardship Program has not yet finalized the Wetlands Stewardship Plan, 2012 water management will be consist primarily of maintenance of existing structures as described in BMP’s 2, 3 and 4 in the Findings Statement and Long Term Plan. Other water management activity will depend on the guidance of the Wetlands Stewardship Program as it develops definitions of wetlands health and guidance for additional BMP’s. Any water management work, other than measures specified in BMP’s 2, 3, and 4, would have to undergo review under SEQRA, and would be subject to Suffolk County’s Council of Environmental Quality (CEQ) review, as well. As per the attached Findings, machine ditch maintenance will be minimal (a maximum of 50,000 linear feet, and probably significantly less). Notice of all machine maintenance work will be provided to CEQ, prior to commencing the work.
2. Larval Control: Perform approximately 15,000 inspections of larval sites. Treat approximately 30,000 acres with Vectobac (Bacillus thuringiensis israelensis or Bi), Vectolex (Bacillus sphaericus) or Altosid (methoprene).

3. Adult Control: Conduct adult control when infestations are severe and widespread and/or necessary to respond to the presence of pathogens.

4. Research and Surveillance: Collect and process 10,000-12,000 larval and adult mosquito samples, depending on mosquito populations and viral activity. Collect and process approximately 50,000 mosquitoes for arbovirus surveillance. Evaluate the effectiveness of treatments. Perform special studies of problem areas, such as identifying the sources of unusual infestations or finding larval habitats of problem species.

Technical and Institutional Framework for Vector Control

To achieve this goal, the Division employs an integrated control program. Control measures are employed in a hierarchical manner that emphasizes prevention, and are guided by a surveillance program to ensure that control measures are only directed to address a clear need. Control proceeds from the more permanent, generally more “environmentally friendly” measures such as water management and biological control through the highly specific larvicides, and uses chemical controls such as adulticides only after other measures prove to be either insufficient or not feasible. This integrated approach is recognized as the most effective and environmentally sound manner in which to conduct a mosquito control program.

Because mosquitoes are of public health importance, the Division works closely with SCDHS. SCDHS operates the Arthropod-Borne Disease Laboratory, with operational support provided by the Division. The laboratory conducts surveillance for mosquito populations and disease activity. The results of this surveillance are used to guide and evaluate the Division’s control work. During times of a public health threat, the Division comes under the operational control of SCDHS. SCDHS is also responsible for other activities related to mosquitoes and the public health, such as medical surveillance, sanitation, environmental monitoring, community outreach and public education.

The New York State Department of Health (DOH) provides important support to the program by analyzing mosquito samples for pathogens, providing technical advice and determining when a public health threat exists. DOH also provides significant assistance with public education, as well as financial aid for vector surveillance and control. Because mosquito control involves work in environmentally sensitive areas and the use of pesticides, environmental compliance and protection are important components of the program. The Division is heavily regulated and subject to inspection under a series of New York State Department of Environmental Conservation (DEC) permits, as well as regulations pertaining to the use of pesticides and licensing of applicators. Close contact is maintained with DEC, United States Fish and Wildlife Services (USFWS) and other agencies throughout the year to ensure that all work is conducted to a high environmental standard.
2012 PROGRAM COMPONENTS

WATER MANAGEMENT: Field personnel conduct this component from January 1 to April 30, and October 1 to December 31 (approximate dates). Water management is a functional way to reduce the need for pesticide applications. The Division expects to conduct water management in each of the County's ten towns. The work will be performed on a priority, as needed basis. Highest priority is assigned to larval habitats where infestations have the greatest potential for negative impact. In particular, areas that showed unexpectedly high infestations in 2011 will have high priority over the coming winter. Water management activities will be carried out in such a manner so that the primary goal of the work will be to protect the health of the marsh.

The purpose of water management is to minimize mosquito production through maintaining existing systems of ditches, culverts and other structures that drain off surface water and/or allow access to potential larval habitats by predatory fish. In some cases, the current ditch system has become an important component of the wetland as it exists today, and maintenance of the system is necessary to maintain tidal flow, fish habitat, or existing vegetative patterns. Much of this is maintenance work that may not require a permit, but is nonetheless conducted after consultation with the New York State Department of Environmental Conservation (DEC) to ensure consistency with conservation of the wetland. Sometimes, work to restore a system, even within its original configuration, requires a permit. In such cases, work is performed under permit and in cooperation with the DEC. Now that the Long Term Plan has been approved, all water management activities will be conducted with appropriate notification to and oversight by-the Wetlands Stewardship Committee and Council for Environmental Quality (CEQ), as outlined in the Findings Statement of the Suffolk County Legislature that was adopted by Suffolk County Resolution 285-2007. Because the Wetlands Stewardship Committee has not yet completed its work in establishing standards for BMP's, water management in 2012 will probably be limited to maintenance activities described in the Wetlands Best Management Practices (BMP's). Existing pipes and culverts may be replaced in place and in kind (BMP 2). There will be cleaning of a maximum of 200,000 linear feet of upland and freshwater wetland ditches with hand labor to maintain the flow of water in mosquito habitats (BMP 3). Machine maintenance of ditches in tidal wetlands will be limited to the minimum needed to maintain those ditches or other structures that provide tidal flow or otherwise serve a critical ecological or public health need, and will total no more than 50,000 linear feet (BMP 4). If the Wetlands Stewardship approves the use of additional BMP's they will be used, subject to appropriate approval process that they will define.

CONTROL OF MOSQUITO LARVAE: All field personnel conduct larval control during the active mosquito season. Most crews conduct ground larviciding, while a heavy equipment crew assists in helicopter larvicide applications. This component is conducted during the active mosquito season of May 1 to September 30 (approximate dates). Larval control is most often employed when water management has not been able to completely prevent mosquito production. It also is used when water management has not been conducted or is not appropriate. Larval control is the Division's second most important control method. Ground crews visit
known larval habitats, check for the presence of larvae, obtain larval specimens for identification in the laboratory and apply larvicide if necessary. Field crews also eliminate larval habitats by unblocking pipes, removing containers or otherwise eliminating standing water. While the acreage of these sites is small, their proximity to residential areas makes them important. Ground crews also respond to complaints from the public. Over 90% of the larvicide used by the Division is applied in the major salt marshes and other wetlands, by helicopter. These marshes are surveyed at least weekly, or after flood tides. If larvae are discovered, a contract helicopter applies larvicide. For salt marshes and similar habitats, either liquid Bti (Bacillus thuringiensis israelensis) or liquid Altosid (methoprene) is applied, based on larval stage, temperature, and weather conditions. Larval control is used only if inspection of a site reveals or has the potential for significant larval production.

The larval control products to be used in 2012 and the conditions under which they are used are described as follows:

Altosid Liquid Larvicide concentrate (methoprene, EPA 2724-446) – Aerial application to tidal and freshwater marshes.

Altosid Liquid Larvicide (methoprene, EPA 2724-392) – Ground application to tidal and freshwater marshes, as well as other temporarily flooded areas.

Altosid Pellets (methoprene, EPA 2724-448) – Ground application to intermittently or permanently flooded areas such as freshwater swamps, catch basins, drainage areas and recharge basins, provided that they are not fish habitats.

Altosid XR-G (methoprene, EPA 2724-451) – Ground or aerial application to tidal wetlands; ground application to intermittently flooded freshwater areas; aerial application in freshwater areas in response to Eastern Equine Encephalitis (EEE) or West Nile Virus (WNV) with case-by-case approval by DEC.

Altosid XR Briquets (methoprene, EPA 2724-421) – Catch basins and other drainage or artificial structures that are not fish habitats. XR briquets will be used in May and June, with follow up treatments using Vectolex or Altosid pellets as necessary.

Aquabac 200G (Bti, EPA 62637) – Ground application to intermittently flooded freshwater and tidal areas. This material is the functional equivalent of Vectobac CG. It is being used because it won the County contract for a granular Bti product.

Valent BioSciences Vectolex CG (B. sphaericus, EPA 73049-20) – Aerial or ground application to freshwater and tidal areas that hold water for more than 7 days, such as ditches, impounded marshes, swamps, ponds; catch basins in July and August.

Sphaeratax SPH (50G) (B. sphaericus, EPA 84268-2) – Aerial or ground application to freshwater and tidal areas that hold water for more than 7 days, such as ditches, impounded marshes, swamps, ponds; catch basins in July and August. This material is the functional equivalent of Vectolex CG. It is being used because it won the County contract for a granular B. sphaericus product.

Valent BioSciences Vectobac 12 AS (Bti, EPA 73049-38) – Aerial application to tidal and freshwater marshes; ground application to intermittently flooded areas such as tidal and freshwater marshes.

Summit B.t.i. Briquets (Bti, EPA 6218-47) – Catch basins, ground depressions, artificial sites.
Fourstar Briquets 90 (Bti plus *B. sphaericus*, EPA 83362-3) – Catch basins, ground depressions, artificial sites.

The equipment to be used for larval control includes various trucks for crew transportation, samplers such as dippers and mosquito traps, truck-mounted hydraulic sprayers, backpack sprayers and granular blowers, plus specially-equipped helicopters for larvicide applications on areas too large or inaccessible for ground treatment. All pesticide applications will use DEC-registered materials and be conducted under appropriate DEC permits and in accordance with label directions and other relevant State and Federal law.

The Division has developed technical guidelines for larval surveillance and control that determine where and when larvicides are used and what materials are chosen for a particular situation. These guidelines emphasize the use of bacterial products when possible and reserve methoprene for those situations where bacterial products are unlikely to be effective. As per the Findings for the Long Term Plan and Executive order 15-2007, the Pesticide Management Committee has reported on the results of its review of literature on methoprene and potential impacts, as well as on research sponsored by the County. The Committee found no significant new concerns regarding the use of methoprene. The County is committed to implementing a Pesticide Reduction Action Plan, that will seek to further accelerate pesticide reduction. As part of this Pesticide Reduction Action Plan, the County will continue to work with technical experts to further refine protocols related to larval monitoring and larvicide usage, consistent with the Long-Term Plan and GEIS. The County is not aware of any new data, studies or reports which contravene research, reports and Findings of the Long Term Plan with respect to larval treatment guidelines or thresholds. Therefore, those Findings are still valid, and control this Annual Plan.

In accordance with the Division's priorities and goals, approximately 1,500 of the 2,077 major larval habitats known to the Division will be surveyed and controlled if necessary throughout the active season. These known habitats consist primarily of freshwater wetlands and salt marshes, as well as roadside ditches, recharge areas and other non-wetland sites. The remaining major larval habitats and the 100,000+ artificial larval sites will be controlled on a complaint basis, as resources permit. Maps showing major larval habitats requiring control are on file at the Division's office in Yaphank.

**CONTROL OF ADULT MOSQUITOES:** This control method is conducted from approximately June 1 through September 15. It is done on an overtime basis; because the need for it is so highly variable it is not efficient to dedicate staff full time to it. This is a tertiary form of control, and the smallest component of the program. It is carried out only when adult infestations constitute an immediate threat of mosquito-borne disease (as determined by SCDHS) or there is a severe and widespread infestation of vector species, as determined by surveys and/or public complaints, in consultation with SCDHS. When virus has not been detected in a community, adulticiding is conducted when the Division can identify an area where there is 1) evidence of mosquitoes biting residents (such as complaints to the Division or requests by public officials); 2) the Division can confirm the existence of a problem by trap counts, landing rates or other staff observations; 3) control is technically and environmentally feasible and 4) the problem is unlikely to resolve itself (through dispersal or weather changes) or may spread without intervention. While the need for
adult control can be reduced by the other program components, it is not possible to control all larval sites in Suffolk County for several reasons. Higher than normal rainfall can increase the need for adult control and some sites cannot be expeditiously treated due to independent permitting requirements, as is the case for larval habitats in the Wilderness portions of Fire Island. In addition, new or unexpected larval habitats always seem to occur, despite the best efforts of the program. It is not appropriate to treat for adult mosquitoes in every area where residents express a concern. Adult control is conducted only when it is clear, based on complaints, Division surveillance and SCDHS consultation that a substantial portion of a community is infested with vector species or there is a threat of mosquito-borne disease. Then, the entire affected area is treated. This strategy treats relatively few areas, but those that are treated receive sufficient control to reduce the problem. The guidelines for adult control will be those described in the GEIS Findings Statement.

Adult control can be deemed to be necessary under two separate operational scenarios. One is defined as a “Vector Control” (public health nuisance) application; the other is defined a “Health Emergency” application. In either case, pesticide use decisions are only made on the basis of scientifically-determined surveillance data.

Vector Control adulticidal applications are made to reduce large numbers of human-biting mosquitoes. Criteria for conducting a Vector Control treatment include:

1. Evidence of mosquitoes biting residents (there is no problem unless people are affected):
   - Service requests from public - mapped to determine extent of problem.
   - Requests from community leaders, elected officials.
2. Verification of problem by SCVC (service requests must be confirmed by objective evidence):
   - New Jersey trap counts higher than generally found for area in question (at least 25 females of human-biting species per night).
   - Centers for Disease Control (CDC) portable light trap counts of 100 or more.
   - Landing rates of one per minute over a five minute period.
   - Confirmatory crew reports from problem area or adjacent larval habitats.
3. Control is technically and environmentally feasible (pesticides should only be used if there will be a benefit):
   - Weather conditions predicted to be suitable (no rain, winds to be less than 10 mph, temperature to be 65°F or above).
   - Road network adequate and appropriate for truck applications.
   - Legal restrictions on the treatment of wetlands, open water buffers, and no-spray list members in the treatment zone will not create untreated areas that would prevent adequate coverage to ensure treatment efficacy.
   - There are no issues regarding listed or special concern species in the treatment area.
   - Meeting label restrictions for selected compounds will not compromise expected treatment efficacy.
4. Likely persistence or worsening of problem without intervention (pesticides should not be used if the problem will resolve itself):
   - Considerations regarding the history of the area, such as the identification of a chronic problem area.
Determination if the problem will spread beyond the currently affected area absent intervention, based on the life history and habits of the species involved.

Absent immediate intervention, no relief from the problem can be expected.

Crew reports from adjacent larval habitats suggest adults will soon move into populated areas.

Life history factors of mosquitoes present – i.e., if a brooded species is involved, determining if the brood is young or is naturally declining.

Seasonal and weather factors, in that cool weather generally alleviates immediate problems, but warm weather and/or the onset of peak viral seasons exacerbate concerns.

Determining, if the decision is delayed, if later conditions will prevent treatment at that time or not. Conversely, adverse weather conditions might remove most people from harm's way.

In essence, criteria 1 and 2 are necessary thresholds which must be met, prior to a treatment being considered, while criteria 3 and 4 are countervailing factors that would indicate treatment is not required despite the presence of an infestation. With enhanced surveillance, there will be rigorous, numeric validation of mosquito control infestation near a potentially affected population in all cases. Treatment will not occur unless criteria 1 and 2 are satisfied through a combination of surveillance indicators, although not all surveillance techniques may be feasible in every setting and situation. The County is not aware of any new data, studies or reports which contravene research, reports and Findings of the Long Term Plan with respect to adulticide treatment guidelines or thresholds. Therefore, those Findings are still valid, and control this Annual Plan.

Vector Control applications will normally be made by truck. Necessary public notices will be issued in a timely manner (normally, at least 24 hours pre-application), and appropriate precautions will be made to meet DEC restrictions on applications, and to avoid “No Spray” properties. If necessary to protect sensitive resources, buffer areas will be provided between the sensitive area and the application equipment. A 150-foot buffer from freshwater wetlands will be provided to avoid the need for DEC Article 24 (Freshwater Wetlands) permits unless a permit or other authorization from DEC has been received.

The need for Health Emergency treatments is determined by the New York State Department of Health West Nile Virus Response Plan for mosquito-borne disease. Because of the persistent presence of WNV in the County, the County perpetually begins each year in Risk Category 2. The New York State Department of Health has determined that there is an ongoing threat to the public health from West Nile Virus, and no longer declares health threats on a year-by-year basis for WNV. As indicators of pathogen presence accumulate (positive dead birds, positive pools of mosquitoes), the Commissioner of the SCDHS determines the need for control measures. If the risk assessments made by SCDHS indicate that risks to the residents of an area of the County are no longer tolerable, the Commissioner will, in conjunction with DEC and SCVC, determine the optimal treatment area to reduce risks of disease transmission to people. In 2009 and previous years, an Emergency Authorization were requested from DEC if freshwater wetlands were involved to eliminate the need for an Article 24 (Freshwater Wetlands) permit. In 2011, NYSDEC issued an Article 24 permit to allow adulticide applications in freshwater wetlands or
adjacent areas if necessary to protect the public health and replace the use of Emergency Authorizations. This permit controls the use of adulticides in and adjacent to freshwater wetlands during the term of that permit, 2011-2020. The permit covers Health Emergency applications throughout the County and will also allow Vector Control applications in and adjacent to some freshwater wetlands in heavily developed areas of southern Brookhaven. Appropriate required public notices will be issued. Pre-application mosquito sampling will be conducted (for efficacy determinations). If, as is often the case for Health Emergency applications, an aerial application is proposed, a helicopter using the Adapco Wingman guidance system will be used to optimize the delivery of the pesticide.

Efficacy measurements will be made following as many adulticide applications as weather conditions and resources allow. The Long-Term Plan also calls for the establishment of resistance testing for the more commonly used compounds.

The Long-Term Plan proposed a general reliance on resmethrin, a synthetic pyrethroid, as the adulticide pesticide. Resmethrin has been found to be an effective pesticide for mosquito control, can be used for ultra-low volume applications for truck and aerial delivery, undergoes rapid decay in the environment, and, as discussed below, has few identified non-target effects when applied as proposed under the Long-Term Plan. Sumithrin, a similar pyrethroid, is proposed to be the primary back-up to resmethrin, and the primary pesticide for any hand-held applications. The Long-Term Plan also identifies two other pyrethroids, permethrin and natural pyrethrins, as potential adulticide compounds. Neither is preferred; however, permethrin is a more widely available product that is manufactured by more than one company, and so may continue to be available under conditions when the patented, less-widely used pyrethroids may not be. Natural pyrethrins are identified as a potentially useful compound because its label allows for use over agricultural areas. In addition to the pyrethroids, malathion, an organophosphate pesticide, was identified as a potential adulticide. Malathion would be used under very specialized conditions, that are unlikely to happen, such if thermal fogging were needed, daylight applications were called for, or if resistance testing indicated pyrethroid applications would be ineffective in meeting the goals of the application. All of these pesticides would be applied at the maximum label rate, as that is the best way of achieving effective mosquito control and is helpful in avoiding the development of pesticide resistance. The adulticides included in this Annual Plan have been fully evaluated in the GEIS for the Long-Term Plan, and this Annual Plan is fully consistent with the attached Findings. For future Annual Plans of Work, the County will continue to review available pesticides and alternatives.

PUBLIC EDUCATION: Mosquito problems resulting from larval habitats around homes and yards, containers, drains and the like, is generally brought to the Division's attention through residents' requests for service. Control of these "domestic" mosquitoes is promoted through education and appeal to individual property owners. Given the WNV threat posed by these mosquitoes, especially Culex pipiens, SCDHS has taken on a leading role in public education. SCDHS has an Educator to assist in this effort, and Sanitarians are utilized to require property owners to clean up potential mosquito larval sites. Public education includes the distribution of pamphlets, telephone contact, site visits, media exposure and presentations to various citizens'
groups and associations. In addition, the Division offers assistance to residents in eliminating sources of mosquitoes on their property, and leaves “door hangers” with educational information at properties they visit. Upgrades to the Division computer systems and cooperation with Health Services and MIS have allowed the establishment of a Web page on the Internet. The appearance of the exotic, container-breeding species *Aedes japonicus* and *Aedes albopictus* means this component will take on increasing importance, since the public’s cooperation will be needed to control these larval habitats.

**PUBLIC NOTIFICATION AND THE “NO-SPRAY” REGISTRY:** In 2000, the County passed new laws to improve required public notification for adult mosquito control. As a result, there is now an increased use of the media and extensive outreach to local officials. The Health Services Web site is used to post spray maps. For each adulticide application, over 150 faxes are sent to various officials and other interested parties. Newsday and News12 post spray schedules and maps. It is important to recognize that adulticide applications are very sensitive to the weather, especially aerial pyrethroid applications. The need to inform the public will need to be balanced with the need to conduct operations promptly, within weather windows and before the problem spreads and more acreage needs treatment. It is usually not appropriate to provide more than 24 hours notice in most cases, because beyond that time, weather forecasts are not very reliable. Attempts to provide more than 24-hour notice often result in many spray operations being announced and then cancelled. These cancellations are very confusing to the public. Despite these difficulties, the County provides 48-hour notice for aerial adulticide applications whenever possible.

In addition to the previous public notification procedures, the County has implemented the new County law, passed in 2010, requiring the use of its “Code Red” automated calling and messaging system to provide more thorough public notice for adultciding. This system allows automated phone calls to be placed to all telephones in an area designated for treatment. These messages provide basic information about the operation, such as spray hours, and refers the recipient to additional sources of information. The system ensures that nearly everyone in the area knows about the operation. Use of the Code Red system in 2011 was very successful and provides a new level of public information for the program.

The Division maintains a “no-spray” registry of residences where adult mosquito control is not desired. During ground applications the application unit is shut off 150 feet prior to passing such a residence and not turned on until 150 feet after. For aerial control, a system has been devised for identifying and avoiding areas with a minimum radius of ¾ mile, more than 65% of the area is residential and where more than 35% of the residences are on the registry. This registry represents an effort to balance the desires of those residents who want control of adult mosquitoes with those who oppose the use of pesticides. At this writing, the “no-spray” registry lists several hundred properties, most of which are in areas where serious infestations are rare. When control is required to deal with a public health emergency, the Commissioner of SCDHS can override the list. Even then list members are telephoned prior to applications in their area through the Code Red system. In addition to this legally required registry, the Division maintains listings of beekeepers and organic farms. Beekeepers’ properties are generally avoided or beekeepers are notified before treatments so that they can protect their hives.
SURVEILLANCE AND RESEARCH: All control operations are based on information obtained from surveillance and research. This a cooperative effort between Vector Control staff in the Department of Public Works and the Arthropod Borne Disease Laboratory in the Department of Health Services. Knowledge of mosquito populations, species composition and arbovirus activity is used to guide and evaluate control measures. Arbovirus surveillance allows the Division, in cooperation with the County and State Health Departments, to gauge the potential for disease transmission and take appropriate action.

A) Mosquito population surveillance: Approximately 12,000 larval and adult mosquito surveys are analyzed each year. These surveys are necessary for locating infestations, directing control efforts and evaluating the effectiveness of those efforts. The mosquito species that breed in various locations are determined from larval samples. Numbers of adult mosquitoes in residential areas are estimated from a network of approximately 29 New Jersey light traps in fixed locations throughout the County. New Jersey traps provide a dead sample three to five times per week. Some 50,000 mosquitoes per year from these traps are identified and counted. In addition, virus surveillance is based on live mosquitoes captured in portable CDC traps (see below).

B) Arbovirus surveillance in mosquitoes: Viral surveillance will be directed primarily at two pathogens, EEE and WNV. Surveillance will be conducted according to the latest CDC and State DOH guidelines, modified for Suffolk County's unique environment. To monitor virus activity, CDC light traps and gravid traps are placed on a weekly or rotating basis at various locations throughout the County. These sites are chosen based on their history of viral activity or the presence of viral indicators such as the finding of birds with WNV in the area. The Division collects and processes approximately 50,000 live, adult mosquitoes annually for viral analysis. In 2012, the samples will be sorted by species, frozen, and sent to Albany for arbovirus analysis in the State DOH laboratory.

C) Bird and other surveillance: SCDHS, State DOH, DEC and CDC monitor other WNV indicators such as unusual bird deaths or the number of dead birds sighted in an area. The presence of WNV-positive birds is a strong indicator of virus activity in an area. The County picks up selected dead birds for WNV testing. The County conducts a rapid, field test (the RAMP test). There are also indications that the number of dead bird sightings in an area is a surrogate indicator of risk. There will also be SCDHS monitoring of hospitals and outreach to physicians to quickly detect any human cases.

D) Efficacy monitoring: While the Division has always monitored the effectiveness of the control program in a variety of ways, there will be an increased effort in this area, based on trial work to develop methods conducted in 2007. In particular, trapping of adult mosquitoes before and after adulticide events will be conducted using carbon dioxide baited CDC light traps. While the number of adult mosquitoes in New Jersey traps and other traps is a key indicator of the overall success of the larval control program, additional effort will be directed toward before and after sampling of treated areas to confirm the efficacy of the treatment methods used. For methoprene applications, this requires bringing pupae from the
treated areas back to the laboratory to determine if they emerge, something that is very labor intensive.

E) Special surveys and field investigations: The Entomologist and other staff also conduct special surveys to determine the source of mosquito problems when they turn up in places where they are not expected. For instance, a survey was conducted that found the larval habitats causing an early season infestation in Belle Terre, allowing larval crews to prevent further trouble through the summer. Likely upcoming work includes studies on mosquito production in catch basins, determining the causes of late-season increases in salt marsh mosquitoes in certain parts of the County such as Heckscher State Park and factors leading to the increase in the Asian tiger mosquito, *Ae. albopictus* in recent years. Given the somewhat unpredictable ways mosquitoes seem to find to cause problems for Suffolk residents, it is important that the Division retain a flexible ability to investigate issues as they come up.

F) Support for Wetlands Stewardship activities: Vector Control continues to provide support for monitoring and other investigations related to Wetlands Stewardship activities. In particular, Division staff assists in the monitoring of the Integrated Marsh Management (IMM) project at Wertheim National Wildlife Refuge. In addition, the Division will assist the Wetlands Stewardship Program in identifying and evaluating prospective sites for future IMM projects, particularly those that will help meet Long Term Plan goals for pesticide use reduction.

Other provisions of the Work Plan notwithstanding, Vector Control may participate in limited research, monitoring, and demonstration projects in cooperation with other levels of government such as the State, Towns or federal agencies such as the US Fish and Wildlife Service or Army Corps of Engineers. These activities, which are not part of this Plan, will be subject to separate permitting and SEQRA compliance, and would be subject to CEQ and Wetlands Stewardship Committee review as well.
Pesticide Use in 2011

The Findings Statement for the Long Term Plan requires Vector Control to provide an annual report of pesticide use to the Legislature. The table below summarizes the use of pesticides by the Division in 2011. The acres treated are compiled by multiplying the total used by the standard dose. In a Duplex treatment, the same acres are treated with both products. The corrected acres represent the total actually treated by subtracting acres of Duplex mix from the total larvicide use to avoid counting the same treatment twice.

I request the introduction of the enclosed Resolution to amend the Adopted 2011 Capital Budget and Program and appropriate funds for the Brownfields Program, Former Blue Point Laundry Site (CP 8223). The former Blue Point Laundry site was an active commercial laundry with dry cleaning capabilities. There is both groundwater and soil contamination, primarily from petroleum products, at this site. This property was taken over by Suffolk County in 1998 and the New York State Department of Environmental Conservation Spills Unit is requiring that Suffolk County enter into a Stipulation Agreement and provide a remediation plan for this site. This resolution will create a capital project for this site and appropriate needed planning funds.

I enclose a financial impact statement and other back-up documentation for this Resolution. If you have any questions on the enclosed, please call Walter Dawydiak 852-5800. Also, an e-mail version of this Resolution was sent to CE RESO REVIEW and the file name is “Reso-HSV-CP 8223 Blue Point Laundry.doc”.

RE: Spill #09-06677, Former Blue Point Laundry Site, 36 Park Street, Blue Point.

Dear Mr. Meyers:

The purpose of this letter is to obtain your (Suffolk County) commitment to cleanup and remove the discharge of petroleum which occurred at the former Blue Point Laundry site, 36 Park Street, Blue Point, New York. As a result of an investigation undertaken by this Department, we believe that Suffolk County is responsible for this discharge.

In an effort to bring about the timely and appropriate cleanup of this discharge, we have enclosed a Stipulation agreement for your signature, a sample Corrective Action Plan (CAP) and the Guidance for Petroleum Spill Stipulation Agreement document. A CAP delineates the work that needs to be done and a schedule for such work. The guidance document includes the required discharge or emission levels that would normally be required for this type of activity. If this agreement is signed, no separate permits will be required. This allows the remediation to start promptly without delays that may be caused by having to obtain Department permits.

By signing the Stipulation agreement, you are not admitting that you caused the discharge or admitting liability for this discharge under Article 12 of the Navigation Law. The sole purpose of the Stipulation is to effectuate the remediation of this discharge in an expeditious fashion. If you choose not to sign this agreement, the Department will hire a contractor to perform the required remediation. This will result in your being billed for the actual costs incurred by the State for this activity.

This agreement will not affect your right to pursue any claims you may have against other parties as a result of this discharge. Additionally, in the event that you are not a responsible party under Article 12 of the Navigation Law, this agreement will not prevent you from filing a claim against the New York Environmental Protection and Spill Compensation Fund.
You should be advised that your agreement to clean up this discharge does not affect the Department's right to pursue any claims that the Department may have against you for penalties based on violations of the Navigation Law or the Environmental Conservation Law arising out of this discharge of petroleum. However, by signing this agreement, you have not waived any defenses you may have to any such claims.

If you choose to perform the remediation of this discharge, please sign the attached Stipulation, draft a Corrective Action Plan and return them to the undersigned. If we have not heard from you or received the signed stipulation within a timely manner, we will proceed, as discussed above, to hire a contractor to perform the required remediation or pursue enforcement action in accordance with Article 12 of the Navigation Law. If you have any questions, please contact Nick Acampora of the Spill Response Staff at (631) 444-0322.

Sincerely,

Karen J. Gomez, P.E.
Regional Spill Engineer

4. This Stipulation does not affect the Department’s right to pursue any claims that the Department may have against Respondent, including but not limited to, claims for alleged violations of the Navigation law or the Environmental Conservation law. SUBJECT: Blue Point Laundry – Request for Appropriation

Additional Planning and Design funding for CP 8223 is critical to address newly discovered contamination at the Blue Point Laundry site which is owned by Suffolk County. Significant contamination has been discovered behind the site on LIRR property. The contaminant plume heads directly towards Corey Creek. Additional funding is required for work plans, reports and additional investigation related to this contamination beyond what has already been approved. The site is currently in the NYSDEC Oil Spill Program and the DEC is very concerned about potential impacts to the creek. They have indicated that proactive steps are necessary to investigate and remediate the problem. Failure to promptly address these issues could result in fines as well as a DEC takeover of the cleanup efforts resulting in penalties in the amount of triple the cleanup costs.

A 2011 appropriation of $100,000 for planning work is requested for this project. To support the critical Blue Point Laundry planning work, we are proposing the following offsets from 2012 Planning authorizations:

- $25,000 from CP 8224 (Harmful Algal Blooms)
- $25,000 from CP 8237 (Water Quality Model)
- $50,000 from CP 8235 (National Estuary Program)

Thank you for your help and please let us know if there are any questions.

MEMORANDUM

TO: Liza Wright
    Budget/Purchasing

FROM: Walter Dawdyak, PE
    Acting Director – Div of Environmental Quality

DATE: September 14, 2011

SUBJECT: Capital Project Request – Peconic Estuary Program
CP 8235 -- $100,000

The SCDHS, Division of Environmental Quality, is requesting appropriation of $100,000 in authorized 2011 CP 8235 planning funds. The requested funding will support the structural and non-structural improvements as listed in one of the existing Peconic Estuary Program (PEP) Subwatershed Management Plans. To date, the PEP has funded the development of ten Subwatershed Management Plans throughout the five East-End towns. These plans were developed to provide a framework for improvements to increase the water quality of impaired waterbodies within the Peconic Estuary. These impaired waterbodies are subjected to stormwater inputs containing bacteria and excess nutrients and the plans focus on improved management of stormwater pollutants, including the primary stressors (nitrogen, phosphorous, suspended solids, and bacteria) and secondary stressors (metals and hydrocarbons) that are negatively impacting the waterbodies.

The stormwater assessments were used to identify likely stormwater pollutant sources as well as areas where best management practices (BMPs) could be installed to improve the management and treatment of stormwater in the watershed. By implementing these plans and carrying out the recommended infrastructure improvements as listed in the plans, impacts caused by stormwater runoff will be mitigated; as a result, thousands of acres of shellfishing waters will benefit leading to increased recreational enjoyment and economic benefit for the region.

The Peconic Estuary grant received from the EPA requires Suffolk County to provide matching funds. CP8235 provides part of those required matching funds.

MEMORANDUM

TO: Honorable Steve Levy, Suffolk County Executive
   Honorable William J. Lindsay, Presiding Officer

FROM: R. Lawrence Swanson, Chairperson

DATE: November 26, 2007

RE: CEQ Review of the Proposed CR 65 Middle Road @ Brown Creek Stormwater Remediation.

At its November 21st, 2007 meeting, the CEQ reviewed the above referenced project. Pursuant to Chapter 279 of the Suffolk County Code, and based on the information received, as well as that given in a presentation by Victor Keneiby, P.E. Associate Civil Engineer and Jonah Rivera, Junior Civil Engineer with the Suffolk County Department of Public Works, the council advises the Suffolk County Legislature and County Executive, in CEQ Resolution No. 126-07, a copy of which is attached, that the proposed project be considered an unlisted action under SEQRA that will not have significant adverse impacts on the environment.

If the Legislature concurs with the Council on Environmental Quality’s recommendation that the project will not have a significant effect on the environment, the Presiding Officer should cause to be brought before the Legislature for a vote, a resolution determining that the proposed action is an unlisted action pursuant to SEQRA that will not have significant adverse impacts on the environment (negative declaration). However, if the Legislature has further environmental concerns regarding the project and needs additional information, then the Presiding Officer should submit a resolution requiring a draft environmental impact statement (positive declaration), and authorize the initiating unit to prepare such a document.

Enclosed for your information is a copy of the EAF, associated information and CEQ Resolution No. 126-07 setting forth the council’s recommendations. If the council can be of further help in this matter, please let us know.

RECOMMENDATION CONCERNING A SEQRA CLASSIFICATION
AND DETERMINATION FOR THE PURPOSES OF
CHAPTER 279 OF THE SUFFOLK COUNTY CODE
FOR THE PROPOSED CR 65 MIDDLE ROAD @ BROWN CREEK STORMWATER
REMEDICATION

WHEREAS, at its November 21, 2007 meeting, the Suffolk County Council on Environmental
Quality reviewed the EAF and associated information submitted by the Suffolk
County Department of Public Works; and

WHEREAS, a presentation regarding the project was given at the meeting by Victor Keneiby,
P.E. Associate Civil Engineer and Jonah Rivera, Junior Civil Engineer with the
Suffolk County Department of Public Works; and

WHEREAS, the project involves replacement of the existing inadequate drainage system to the
west and east of Brown Creek with leaching basins and structural stormwater
treatment units to prevent the current direct discharge of stormwater and provide
treatment to the runoff; now

Be It Therefore

RESOLVED, that in the judgment of the CEQ, based on the information received and
presented, the above activity is an unlisted action under the provisions of Title 6
NYCCR Part 617 and Chapter 279 of the Suffolk County Code; and

Be It Further

RESOLVED, that based on the information received, a quorum of the council recommends to
the Suffolk County Legislature and County Executive, pursuant to Chapter 279 of
the Suffolk County Code, that the project will not have significant adverse impacts
on the environment for the following reasons:

1. the proposed action will not exceed any of the criteria in Section 617.7 of Title 6
   NYCRR which sets forth thresholds for determining significant effect on the
   environment, as demonstrated in the Environmental Assessment Form:
2. the proposal does not appear to significantly threaten any unique or highly valuable
   environmental or cultural resources as identified in or regulated by the Environmental
   Conservation Law of the State of New York or the Suffolk County Charter and Code:
3. the project is necessary to comply with the Suffolk County policy limiting direct
   discharge of stormwater runoff to surface water:
4. The action is in conformance with the Long Island South Shore Estuary Reserve
   Comprehensive Master Plan and the NYSDEC Stormwater Remediation Manual; and

that the Legislature and County Executive adopt a SEQRA determination of
non-significance (negative declaration).

Re: MV 2011/12 Award for Motor Vehicle Theft and Insurance Fraud Prevention Program

Dear Ms. Furey:

I am pleased to advise you that the Suffolk County Police Department has been awarded $120,000 in SFY 2011/12 grant funds with agreement by the New York State Motor Vehicle Theft and Insurance Fraud Prevention Board (the Board). This funding is available through the Motor Vehicle Theft and Insurance Fraud (MVTIF) Prevention Demonstration Program to support the program proposal described in your recent grant application.

Over $4.4 million in grant funding was requested as compared to the $3.8 million available for awards in this cycle. As a result of this overwhelming response, the Board was able to recommend funding at reduced levels. We will work with you to help structure your proposed program consistent with the award amount.

The Statewide Plan of Operation for motor vehicle theft and insurance fraud, as legislated by Article 36-A of the Executive Law, requires a coordinated approach to detect, prevent, deter and reduce motor vehicle theft and insurance fraud. The Division of Criminal Justice Services (DCJS) requires that all MVTIF grantees develop a strategy that includes a threat assessment describing the scope of the motor vehicle theft and insurance fraud problem and the coordinated efforts that would be utilized to effectively combat these crimes. An evaluation of these efforts will be incorporated into the project work plan for the 2011/2012 grant period.

All grant recipients are required to enter investigative targets in the Secure Automated Fast Event Tracking Network (SAFETNet) as a special condition of the award. During the contract period, grantees will be expected to produce substantiated information, both statistical and programmatic, on the effectiveness of the initiatives implemented by the grant program. This information is essential to demonstrate the success of your program and may influence the continued support of your program initiatives in future funding cycles.

An Equal Opportunity/Affirmative Action Employer
The primary contact for your project will receive a contract preparation package from the DCJS Office of Program Development and Funding Criminal Justice Program Representative (CJPR) assigned to this project. The CJPR will assist your office in the development of the MVTIF grant contract. If you have any questions related to the Motor Vehicle Theft and Insurance Fraud Prevention Program, please call the MVTIF Program staff at (518) 457-8404.

On behalf of the Board and DCJS, congratulations on your award. We look forward to continuing to work with you to reduce motor vehicle theft and insurance fraud in New York State.

Very truly yours,

Sean M. Byrne

STATE ASSISTANCE CONTRACT

IN RE:

Municipality Name: Suffolk County
Site Name: Former Bellport Gas Station
Site Address: 1401 Montauk Highway
Site Number: E152194

Contract Number: C304320

This CONTRACT is made between the New York State Department of Environmental Conservation (Department), acting for and on behalf of the State, and the Suffolk County, with offices located at Office of the County Executive, P.O. Box 6500, H. Lee Dennison Building, Hauppauge, New York 11788-0099.

WHEREAS, the Department is authorized by Article 56 of the New York State Environmental Conservation Law (hereinafter the "ECL") to enter into contracts on behalf of the State to provide State Assistance; and

WHEREAS, this Contract No. C304320 incorporates by reference Contract No. T303811 which the Department and the Municipality entered into on July 1, 2008. The original estimated eligible costs under Contract No. T303811 of $50,670 resulted in a state assistance contract of $46,346 for the original investigation scope of work. Since the contract amount was under $50,000 the contract was given a "T" designation that now precludes it from being increased to cover the revised estimated eligible costs. Therefore, a new Contract No. 304320 is required for the estimated increase in eligible costs of $79,756 to complete the investigation and perform the Interim Remedial Measure which results in a state assistance contract amount of $71,780. See Schedule A for additional details; and

WHEREAS, the Legislature has determined that the preservation, enhancement, restoration and improvement of the quality of the State’s environment is one of government’s most fundamental obligations; and

WHEREAS, the Legislature authorized the Department to enter into contracts with municipalities to provide State Assistance to them to develop and implement Environmental Restoration Program projects approved by the Department for eligible properties held in title by them; and

WHEREAS, Municipality has applied for State Assistance to develop and implement an Environmental Restoration Program project (Project), the purpose and scope of which is set forth in Schedule A Scope of Work of this Contract, on the Site that is described in Appendix C Proof of Ownership and Legal Description of Site of this Contract, by metes and bounds and by reference to a recorded map showing its boundaries and bearing the seal and signature of a licensed land surveyor; and

Dear Mr. Crannell:

I request the introduction of the enclosed Resolution to amend Resolution No. 1357-2007, amended by Resolution Nos. 685-2008 and 547-2009 in Connection with the Brownfields Program (CP 8223.111). The County is required to first fund the entire cost of the project and then receives reimbursement from the State based on actual expenditures. This Resolution is needed to accept additional State reimbursement and reduce capital borrowing for the former Bellport Gas Station site.

I enclose a financial impact statement and other back-up documentation for this Resolution. If you have any questions on the enclosed, please call Diane Weyer 3-6455. NOTICE OF LIMITS

FOR

FY 2012 STATE AND LOCAL OVERTIME REIMBURSEMENTS

Subject to the availability of funding and legislative authorization, the FBI may reimburse state and local law enforcement agencies (LEA) for the cost of overtime incurred by officers assigned full-time to FBI managed task forces provided the overtime expenses were incurred as a result of task force related activities. Consistent with regulation and policy, a separate Cost Reimbursement Agreement (CRA) must be executed between the FBI and the LEA and an underlying Memorandum of Understanding (MOU) must exist in support of the task force relationship.

For Fiscal Year 2012, the maximum limits for reimbursements under these CRAs are $1,433.52 per month and $17,202.25 per year for each officer assigned full-time to the task force. These limits are effective for overtime worked on or after October 1, 2011.

FBI field offices and state and local law enforcement agencies may process overtime reimbursement requests under formally executed CRAs in accordance with the authority of this notice. This notice is issued unilaterally by the FBI's Head of Contracting Activity and does not require formal acceptance and signature by FBI field offices and state and local law enforcement agencies.

COST REIMBURSEMENT AGREEMENT
BETWEEN
THE FEDERAL BUREAU OF INVESTIGATION (FBI)
AND
SUFFOLK COUNTY POLICE DEPARTMENT (AGENCY)

TASK FORCE FILE # 66F-NY-266217-B

Pursuant to Congressional appropriations, the FBI receives authority to pay overtime for police officers assigned to the formalized Joint Terrorism Task Force as set forth below for expenses necessary for detection, investigation, and prosecution of crimes against the United States. It is hereby agreed between the FBI and the Suffolk County Police Department located at 30 Yaphank Avenue, Yaphank, NY 11980, Taxpayer Identification Number: 116000464, Phone Number: (631) 852-6105 that:

1. Commencing upon execution of this agreement, the FBI will, subject to availability of required funding, reimburse the agency for overtime payments made to officers assigned full-time to the task force.

2. Requests for reimbursement will be made on a monthly basis and should be forwarded to the FBI field office as soon as practical after the first of the month which follows the month for which reimbursement is requested. Such requests should be forwarded by a Supervisor of the agency to the FBI Task Force Squad Supervisor and Special Agent in Charge for their review, approval, and processing for payment.

3. Overtime reimbursements will be made directly to the agency by the FBI. All overtime reimbursement payments are made by electronic fund transfer (EFT). An ACH Vendor/ Miscellaneous Payment Enrollment Form must be on file with the FBI to facilitate EFT.

4. Overtime reimbursements will be calculated at the usual rate for which the individual officer's time would be compensated in the absence of this agreement. However, said reimbursement, per officer, shall not exceed monthly and/or annual limits established annually by the FBI. The limits, calculated using Federal pay tables, will be in effect for the Federal fiscal year running from October 1st of one year through September 30th of the following year, unless changed during the period. The FBI reserves the right to change the reimbursement limits, upward or downward, for subsequent periods based on fiscal priorities and appropriations limits. The FBI will notify the agency of the applicable annual limits prior to October 1st of each year.

5. The number of agency officers assigned full-time to the task force and entitled to overtime reimbursement by the FBI shall be approved by the FBI in advance of each fiscal year. Based on the needs of the task force, this number may change periodically, upward or downward, as approved in advance by the FBI.

OCCO CRA template 5/23/04
6. Prior to submission of any overtime reimbursement requests, the agency must prepare an official document setting forth the identity of each officer assigned full-time to the task force, along with the regular and overtime hourly rates for each officer. Should any officers change during the year, a similar statement must be prepared regarding the new officers prior to submitting any overtime reimbursement requests for the officers. The document should be sent to the field office for FBI review and approval.

7. Each request for reimbursement will include the name, rank, ID number, overtime compensation rate, number of reimbursable hours claimed, and the dates of those hours for each officer for whom reimbursement is sought. The request must be accompanied by a certification, signed by an appropriate Supervisor of the agency, that the request has been personally reviewed, the information described in this paragraph is accurate, and the personnel for whom reimbursement is claimed were assigned full-time to the task force.

8. Each request for reimbursement will include an invoice number, invoice date, taxpayer identification number (TIN), and the correct banking information to complete the electronic fund transfer. The necessary banking information is the Depositor Account Title, Bank Account Number, Routing Number, and Type of Account (either checking, savings, or lockbox). If the banking information changes, a new ACH Vendor/Miscellaneous Payment Enrollment Form must be submitted to the FBI.

9. Requests for reimbursement must be received by the FBI no later than December 31st of the next fiscal year for which the reimbursement applies. For example, reimbursements for the fiscal year ending September 30, 2005 must be received by the FBI by December 31, 2005. The FBI is not obligated to reimburse any requests received after that time.

10. This agreement is effective upon signature of the parties and will remain in effect for the duration of the agency's participation in the task force, contingent upon approval of necessary funding, and unless terminated in accordance with the provisions herein. This agreement may be modified at any time by written consent of the parties. It may be terminated at any time upon mutual consent of the parties, or unilaterally upon written notice from the terminating party to the other party at least 30 days prior to the termination date.

jp-bw2-17-11 CP 8189 transferring T30-EE funds Reso Submittal Sheet
MEMORANDUM

TO: Ken Crannell, Deputy County Executive
FROM: James Peterman, P.E., Acting Chief Deputy Commissioner
SUBJECT: Transferring T-30, EE Funds to the Capital Project Studying Sewer Capacity in Unsewered Areas of Suffolk County (CP 8189)
DATE: November 28, 2011

Attached is a draft resolution, SCIN Form 175a and 175b, and backup for the referenced capital project filed as Reso DPW-CP 8189-Transferring T-30, EE funds 2-17-11 and backup filed as Backup DPW-CP 8189-Transferring T-30, EE funds 2-17-11. Funds have been appropriated in CP 8185 and CP 8189 to perform sewer studies in various areas throughout the County. The authorization contained in the appropriating resolutions directed an RFP to be prepared and issued and a selection to be recommended to the Legislature. The recommendation made to the Legislature was to award the project to two consulting teams, one to perform sewer studies in sewered areas which would utilize the funds in CP 8185 and the other to perform sewer studies in unsewered areas with the funds in CP 8189. The funds in CP 8189 are insufficient to provide the completed work and, therefore, this resolution transfers $500,000 from the Dry Sewer Funds included in account T-30, EE.

It is noted that Resolution 876-2010 which defines the conditions of utilizing the Dry Sewer Funds indicates that as of February 1, 2011 those funds would be available. Based on the Legislative schedule for 2011, this resolution can be laid on the table at your earliest convenience and would satisfy the conditions of that resolution.

RESOLUTION NO. 876 -2010, ADOPTING LOCAL LAW
NO. 53 -2010, A LOCAL LAW TO AMEND THE SUFFOLK
COUNTY CODE IN REGARD TO SEWER SYSTEM REFUNDS

WHEREAS, there was duly presented and introduced to this County Legislature
at a regular meeting held on August 3, 2010, a proposed local law entitled, "A LOCAL LAW TO
AMEND THE SUFFOLK COUNTY CODE IN REGARD TO SEWER SYSTEM REFUNDS"; and
said local law in final form is the same as when presented and introduced; now, therefore be it

RESOLVED, that said local law be enacted in form as follows:

LOCAL LAW NO. 53 -2010, SUFFOLK COUNTY, NEW YORK

BE IT ENACTED BY THE COUNTY LEGISLATURE OF THE COUNTY OF
SUFFOLK, as follows:

Section 1. Legislative Intent.

This Legislature hereby finds and determines that from approximately 1965-1987, the
Suffolk County Sewer Agency administered a program, referred to as the Suffolk County "Dry
Sewer Program," whereby the County would enter into agreements with subdividers, developers
and land users to provide for the construction, conveyance and installation of sewage collection
and treatment systems for dedication to future County sewer districts, as well as for the
installation of dry sewer lines for use in future County sewer districts.

This Legislature further finds and determines that pursuant to the Dry Sewer Program, in
lieu of such installations, subdividers, developers or land users were permitted to make a
contribution to the "Dry Sewer Fund" (T-30, EE), which would then be utilized for future
installations or future plant construction.

This Legislature also finds and determines that in 1987, this Legislature enacted Chapter
162 of the Administrative Local Laws which ended the Dry Sewer Program and called for a
refund of the 7.6 million dollars that remained in the Dry Sewer Fund.

This Legislature further finds and determines the County last issued a refund from the
Dry Sewer Fund in 2007 and that, currently, approximately $882,864.40 remains in the Fund.

This Legislature also finds that the Suffolk County Department of Public Works is
undertaking projects pursuant to which it will be reviewing the development of future sewer
districts in Suffolk County.

This Legislature therefore now finds and determines that any remaining unclaimed funds
in the Dry Sewer Fund T-30, EE as of February 1, 2011, should be utilized for the purpose of
planning and establishing future communal sewerage systems in Suffolk County.
Section 2. Amendments.

Chapter 162 of the SUFFOLK COUNTY ADMINISTRATIVE CODE is hereby amended to read as follows:

§ 162-3. Refunds

jp-bw2-22-11 CP 8165 transferring T30-EE funds SCADA Reso Submittal Sheet
MEMORANDUM

TO: Ken Crannell, Deputy County Executive
FROM: James Peterman, P.E., Acting Chief Deputy Commissioner
SUBJECT: Transferring T-30, EE Funds to the Capital Project - Surveillance Control and Data Acquisition (SCADA) (CP 8165)
DATE: November 28, 2011

Attached is a draft resolution, SCIN Form 175a and 175b, and backup for the referenced capital project filed as Reso DPW-CP 8165 – Transferring T-30, EE funds for Surveillance Control and Data Acquisition (SCADA) 2-22-11 and backup filed as Backup DPW-CP 8165- Transferring T-30, EE funds for Surveillance Control and Data Acquisition (SCADA) 2-22-11. The T-30, EE funds were referred to as a Dry Sewer Program Funds. The Dry Sewer Program Funds were composed of contributions by developers and sub-dividers to be utilized for future installation or future plant construction. Those funds were determined by the Legislature to be refunded in 1987 and due to the adoption of the Local Law indicating that any funds not refunded by February 1, 2011 could be utilized for the development of future sewer districts and future installations of plant construction. The SCADA program involves data that can be utilized to evaluate capacity for future expansion and the connection of adjacent areas in order to eliminate the need for additional wastewater treatment facilities and, therefore, is appropriate for this use. This resolution transfers the remaining portion of the Dry Sewer Funds that is $382,864.40 plus accrued interest into this capital project.

We would appreciate this resolution being laid on a table at the earliest convenience.

MEMORANDUM

TO: Ken Crannell, Deputy County Executive
FROM: James K. Peterman, P.E., Acting Chief Deputy Commissioner
DATE: August 26, 2011
RE: Amending Resolution No. 821-2010 in Connection with Acquisition of Properties for the Reconstruction of CR 3, Pinelawn Road, Towns of Huntington and Babylon (CP 5510)

Attached is a draft resolution and duplicate copy to amend Resolution No. 821-2010 for land acquisition in connection with the above referenced project. The Federal Highway Administration, through the New York State Department of Transportation, has reassigned Project Identification Numbers (PINs) to this federally-aided project, separating the right-of-way acquisition phase into two PINs. This action requires the County to amend and reallocate funding originally appropriated under Resolution No. 821-2010, moving some of the funding into a new PIN and appropriating resolution.

$5,316,250 originally appropriated under the above referenced resolution will be reduced to $4,000,000, with the remaining $1,316,250 to be reallocated into the new PIN and resolution.

The Suffolk County Council on Environmental Quality has reviewed this project and determined that it constitutes an unlisted action and no further review is required. The Suffolk County Legislature concurred with this finding pursuant to Resolution 981-2008.

An e-mail version of this resolution was sent to CE RESO REVIEW saved under the title “Reso-DPW-CP5510(CR3 ROW Realloc PIN 075656).doc”.

MEMORANDUM

TO: Ken Crannell, Deputy County Executive
FROM: James K. Peterman, P.E., Acting Chief Deputy Commissioner
DATE: August 26, 2011
RE: Amending Resolution No. 821-2010 and Amending the 2011 Capital Budget and Program to Reallocate and Increase Funding in Connection with Acquisition of Properties for the Reconstruction of CR 3, Pinelawn Road, Towns of Huntington and Babylon (CP 5510)

Attached is a draft resolution and duplicate copy to amend Resolution No. 821-2010 and increase funding for land acquisition in connection with the above referenced project. There are insufficient funds included in the 2011 Capital budget and program for this project. However, pursuant to the Suffolk County charter, Section C4-13, an offsetting authorization is not required on amendments which are financed in an amount of at least fifty percent (50%) by Federal or State aid.

The Federal Highway Administration, through the New York State Department of Transportation, has reassigned Project Identification Numbers (PINs) to this federally-aided project, separating the right-of-way acquisition phase into two PINs. This action requires the County to amend and reallocate funding originally appropriated under Resolution No. 821-2010, moving some of the funding into this new PIN and appropriating resolution. $1,316,250 will be reallocated from the above referenced resolution, with additional funding in the amount of $883,750 into the new PIN and resolution.

The Suffolk County Council on Environmental Quality has reviewed this project and determined that it constitutes an unlisted action and no further review is required. The Suffolk County Legislature concurred with this finding pursuant to Resolution 981-2008.

An e-mail version of this resolution was sent to CE RESO REVIEW saved under the title “Reso-DPW-CP5510(CR3 ROW Realloc PIN 075987).doc”.

This resolution reallocates partial funding from Resolution 821-2010, as the Feds/State have now broken our project into two Project Identification Nos. (PINS), which requires us to reallocate a partial amount from Reso 821-2010 to this new resolution (PIN 075987), and also to amend the 2011 CB/CP and appropriation additional funds for ROW. These funds are reimbursable at 80%.

MEMORANDUM

TO: Ken Crannell, Deputy County Executive
FROM: James K. Peterman, P.E., Acting Chief Deputy Commissioner
DATE: August 26, 2011
RE: Amending Resolution 894-2010 in Connection with Acquisition of Properties for the Reconstruction of CR 3, Pinelawn Road, Towns of Huntington and Babylon and Removing Federal Aid (CP 5510)

Attached is a draft resolution and duplicate copy to amend Resolution 894-2010 to remove the Federal share allocation in connection with ancillary costs associated with the acquisition of properties for the reconstruction of CR 3, Pinelawn Road. It has been determined that is would be in the best interest of Suffolk County to fully fund the $250,000 required for these ancillary costs, as the costs associated with the purchase (acquisition) of properties will be much greater, and these costs will be reimbursed by Federal funds at 80%.

The Suffolk County Council on Environmental Quality has reviewed this project and determined that it constitutes an unlisted action and no further review is required. The Suffolk County Legislature concurred with this finding pursuant to Resolution 981-2008.

An e-mail version of this resolution was sent to CE RESO REVIEW saved under the title “Reso-DPW-CP5510(CR3 ROW Ancillary Realloc).doc”.

RESOLUTION NO. -2011, ADOPTING LOCAL LAW NO. -2011, A CHARTER LAW REQUIRING THE VOTE ON THE COUNTY BUDGET PRIOR TO ELECTION DAY

WHEREAS, there was duly presented and introduced to this County Legislature at a regular meeting held on , 2011, a proposed Local Law entitled "A CHARTER LAW REQUIRING THE VOTE ON THE COUNTY BUDGET PRIOR TO ELECTION DAY," and said local law in final form is the same as when presented and introduced; now, therefore be it

RESOLVED, that said local law be enacted in form as follows:

LOCAL LAW NO. -2011, SUFFOLK COUNTY, NEW YORK

A CHARTER LAW REQUIRING THE VOTE ON THE COUNTY BUDGET PRIOR TO ELECTION DAY

BE IT ENACTED BY THE COUNTY LEGISLATURE OF THE COUNTY OF SUFFOLK, as follows:

Section 1. Legislative Intent.

This Legislature finds and determines that in the last few annual budget cycles, amendments to the recommended operating budget are not being distributed within the prescribed timeline. This is not in the best interests of the residents of the County. People who are affected by the budget and these amending resolutions are not given any time to evaluate the financial impact of budget amendments, the Budget Office is not given any time to do any financial analysis, and the public at large is deprived of information about the budget until the time of the vote. Moreover, legislators are deprived of the opportunity to read the details of the proposed budget plan. This delay diminishes transparency in the budget process and deprives the public of detailed comment during any public portion of the meeting of the Legislature wherein the budget is adopted.

Therefore the purpose of this law is to accelerate the budget timeline.

Section 2. Amendments.

Article IV of the Suffolk County Charter is hereby amended as follows:

Article IV
County Budget and Capital Program

***
§ C4-9.  A.) The County Legislature shall hold at least two public hearings on the proposed county budget not later than the [31st] 17th day of October in each year [or the 42nd day after the County Executive has actually submitted the proposed budget required by § C4-6 to the County Legislature, whichever is later]. The County Legislature shall have available for the public in advance of the hearings a reasonable number of copies of the tentative budget.

***

§ C4-10.  A.) Not less than 10 days after public hearings required by § C4-9 and not later than election day [the 10th day of November or the 52nd day after the County Executive has actually submitted the proposed budget required by § 4-6 to the County Legislature, whichever is later], the County Legislature shall adopt the proposed county budget consisting of an expense budget by voting to approve a separate mandated portion and a separate nonmandated portion, with or without amendment. If the County Legislature does not adopt a county budget on or before election day [the 10th day of November or the 52nd day after the County Executive has actually submitted the proposed budget required by § C4-6 to the County Legislature, whichever is later], the proposed county budget shall be deemed adopted as submitted. The Suffolk County Legislature's Budget Review Office shall prepare budgetary and financial forecasts of cost to continue expenditures and revenues for major omnibus-type budget amending resolutions for the following year.

***

Section 3. Applicability.

This law shall apply to all actions occurring on or after the effective date of this law.

Section 4. Severability.

If any clause, sentence, paragraph, subdivision, section, or part of this law or the application thereof to any person, individual, corporation, firm, partnership, entity, or circumstance shall be adjudged by any court of competent jurisdiction to be invalid or unconstitutional, such order or judgment shall not affect, impair, or invalidate the remainder thereof, but shall be confined in its operation to the clause, sentence, paragraph, subdivision, section, or part of this law, or in its application to the person, individual, corporation, firm, partnership, entity, or circumstance directly involved in the controversy in which such order or judgment shall be rendered.

Section 5. SEQRA Determination.
This Legislature, being the State Environmental Quality Review Act (SEQRA) lead agency, hereby finds and determines that this law constitutes a Type II action pursuant to Section 617.5(c)(20), (21), and/or (27) of Title 6 of the NEW YORK CODE OF RULES AND REGULATIONS (6 NYCRR) and within the meaning of Section 8-0109(2) of the NEW YORK ENVIRONMENTAL CONSERVATION LAW as a promulgation of regulations, rules, policies, procedures, and legislative decisions in connection with continuing agency administration, management and information collection. The Suffolk County Council on Environmental Quality (CEQ) is hereby directed to circulate any appropriate SEQRA notices of determination of non-applicability or non-significance in accordance with this law.

Section 6. Effective Date.

This law shall not take effect until at least sixty (60) days after its adoption, nor until approved by the affirmative vote of a majority of the qualified electors of the County of Suffolk voting on a proposition for its approval if within sixty (60) days after its adoption there is filed with the Clerk of the County Legislature a petition protesting against this law in conformity with the provisions of Section 34(4) of the NEW YORK MUNICIPAL HOME RULE LAW and upon filing in the Office of the Secretary of State.

RE: MEMORANDUM OF COUNSEL TO THE LEGISLATURE PURSUANT TO RULE 28

---------------------------------------------------------------------------------------------------------------------

PROPOSED LOCAL LAW YEAR 2011

TITLE: I.R. NO. 2011; A CHARTER LAW REQUIRING THE VOTE ON THE COUNTY BUDGET PRIOR TO ELECTION DAY

SPONSOR: PRESIDING OFFICER, ON REQUEST OF THE COUNTY EXECUTIVE

DATE OF RECEIPT BY COUNSEL: 11/22/2011 PUBLIC HEARING: 12/20/2011
DATE ADOPTED/NOT ADOPTED: ________ CERTIFIED COPY RECEIVED: ________

This proposed charter law would alter the timeline under which the County Legislature adopts an operating budget each year.

Specifically, the law would advance the date by which the County Legislature must hold public hearings on the budget from October 31st to October 17th and require the Legislature to adopt an operating budget by Election Day. Currently, November 10th is the outside date for the Legislature to adopt an operating budget.

This law is made subject to a permissive referendum.
